VOLUME FIVE

STONY PLAIN, ALBERTA, THURSDAY, JULY 2, 1925.

Whole No. 287

This Week's Special

A Beautiful New Granite-ware in Blue and White.

Just what You Have Been Looking For.

The price is Very Reasonable, considering the high quality of the Goods.

+++

A. E. MICHAEL,
A-GOOD PLACE TO TRADE.

Road Work.

Considerable road work has been performed the past fortnight in the outside Rural divisions, with some new work such as the road from Bluesberry church south and west, as a short cut to Carvel station. This road runs between the Garr and Tyrkalo properties, and when completed will be greatly appreciated by those having business in Howatville.

The Department surveys were out from the City last week, sizing up the situation on the proposed extension of the Meridian road south from Simms. Councillor McKinlay, Reeve Brax and Councillor Schmetz were a delegation who waited on the Minister Friday last with regard to this proposition.

On Monday last a good-sized road gang was on the job, starting from Ursel's corner, coming north.

Something New

Dr. Scholl's Pedograph

A photograph of your foot. A wonderful invention by Dr. Wm. M. Scholl, the noted foot authority. In a moment—without removing shoes—we can make an exact impression of your feet, so clear and simple that you can see for yourself their true condition. It's a pleasure for us to render you this exceptional service, absolutely free. Our Foot Comfort Expert will explain to you why you have foot trouble and the best method of quickly and permanently eliminating it.

Come in without fail and see our this new Pedograph service.

PAUL WERNER,

Graduate Practicist.
Opposite Royal Hotel.

Calendar.

- July 2 to 8—Synodical Conference St. Matthew's Church.
- 3—Inga Councillors meet in Stony Plain.
- 3—U. F. A. dance at Holborn Hall.
- 4 & 5—Convention of Walther League in Stony Plain.
- 8—Demonstration of blasting stamps at C. Schulz farm.
- 13 to 18—Edmonton Exhibition and Stampede.

Death of an Old-timer

Mr. L. Yost, an old timer of Stony Plain District, died on Monday last, June 29, at his home in Vegreville.

Deceased came to Alberta from Denver, Colorado, in the year 1896, and homesteaded north of Stony Plain. He lived here until 1918, when moved to Vegreville upon retiring from farming.

Mrs. Adam Wolf and Mr. C. Yost left yesterday, to be present at the funeral.

The Liberal Convention.

A large and representative gathering of Liberals of Stony Plain constituency was held in Stony on Monday last. The occasion was the election of officers for 1925 and the nomination of a candidate for the Alberta Legislature.

The meeting was called to order shortly after 3 by Pres. Bristow. The election of officers resulted: F. J. Franney, Pres.; R. H. Pidgeon, Sec.

The promise that there would be sufficient aspirants for the nomination as Assemblyman was amply fulfilled, some eight names being submitted, these being: R. M. Outway, John H. Miller, W. E. Bristow, W. J. Davidson, Dan Brock, E. Bischoff, Mord McKinlay, R. B. Brooks. At the final ballot, Dr. Outway secured the majority vote over Mord McKinlay.

Those who addressed the delegates were: Hon. Chas. Mitchell, the Liberal leader; Pres. Franney, E. C. Fischer, Jas. Reilly.

CLOSING NOTICES.

The business houses in Stony Plain close every Wednesday at 1 p. m. during July and August.

Stony Plain Postoffice will be closed Wednesday afternoon at 8 o'clock in July and Aug.

The three elevators in Stony will close Wednesday at 1 p. m. during July and August.

LOCAL NEWS.

Mrs. Jas. Smith left yesterday on a motor trip to Calgary, on a visit with her parents.

Miss Margaret Fischer left Monday on a visit with friends at Athabasca.

Ed Doll, the young sport, leaves today for his home at Ledue.

Miss Mabel Carr, who had been studying in Edmonton, returned to her home in Stony Friday night.

Charlie Holling, Edmonton, was a Stony visitor on Saturday.

Mr. Bill Smith, who had been attending Stony Plain High the past term, left yesterday for his home near Red Deer.

Mr. Gus Gitzel has acquired a new Ford car from Mr. John Miller.

Mr. Pidgeon, tax collector for Inga M. D., was in Stony Saturday, and was fairly well patronised.

Mr. and Mrs. J. H. Miller were hosts Sunday evening to a dinner party of friends from Stony and Edmonton.

Inga councillors meet tomorrow, July 3rd, at Stony Plain.

Stony Plain Council meets tonight. The Councillors are hoping the young man with a brain storm who invaded their councils at the last meet, will kindly refrain on this occasion.

A demonstration of blowing up stamps will be given on Charlie Schultz farm on Wednesday next July 8.

Mr. Phil D. Fuhr has secured the agency for the Essex auto, a car made by the Hudson people. Phil is demonstrating with a closed six—see him, and take a ride.

The Walther League convention opens next Saturday when delegates from British Columbia and Alberta will meet in Stony for a 2-day convention.

The Mission Festival on the grounds at St. Matthew's Church on Sunday afternoon was very well attended. The usual services were held.

A few missionaries, with their Gospel van, have been making visits to Stony on several evenings, a song service and preaching being given.

The big wind Sunday afternoon toppled over some half-dozen telephone poles just south of town, on Meridian road. The fallen poles, with their network of wires, encroached so much on the traveled road, that cars returning from the Beach after dark had narrow escapes from a collision.

Canada's Tied-Up Resources

(Third Article)

In all articles appearing in this column, it is sought to be optimistic and constructive, rather than pessimistic and destructive, because only so can any service of real value to the community be rendered. Having in the previous two articles on "Canada's Tied-Up Resources" outlined the situation which confronts every citizen and lover of this Dominion—and an extremely critical situation it unquestionably is—some attention should be devoted to finding a solution. If, indeed, one can be found. But found it must be if Canada is not to continue in the doldrums for many years to come, cheated of the position among the nations of the world which Nature intended (through the variety and abundance of its gifts) this country to occupy.

The first essential to a solution is an awakening of the people of Canada to a full realization of their country's present position in respect to its resources. A second, and equally important essential, is frankness and courage on the part of public men of all parties in facing and grappling with the problem confronting Canada.

It is necessary that present alibioses, pet policies, and parizan nostrums be completely scrapped and relegated to a forever buried past. Instead of continuing to waste time debating in just what manner the stifle can best be locked now that the horse is stolen, each interested citizen in Canada should unite with other interested citizens in an endeavor to, if possible, recover the stolen horse.

The battle for and against embargoes, or export duties, on pulp wood and pulp, on waterpower and electric energy, on nickel and other ores, is being waged with vigor. It is largely beside the mark. At best embargoes and export duties are but half measures and likely to result in reprisals. They do not go to the basic root of the whole trouble, namely, that an enormous amount of Canada's natural resources have passed from Canadian ownership and control into foreign control, and that control is being exercised to the detriment of Canada, checking development, employment, growth of population and industry, and making full prosperity impossible.

The last thing to be advocated in this column is repudiation of obligations, whether national or entered into through private contract. Consequently no such thing is expressed or implied. It must be recognized, however, that when the natural resources of any country—the property of all the people—pass into private ownership and control, there also passes to the new owners an obligation to the people and country who were the original owners. That obligation, expressed in written contract or not, is that the resources in question shall be developed for use of the people as a whole, thereby providing for their wants and advancing the welfare of the country at large. If this obligation is not carried out honestly and to the full ability of the new owners, then the original owners have right and justice on their side in demanding either the discharge of such obligation or a return of the property.

With such huge losses at stake as the success of our railways, the property of all our industries, employment for our people, increased population and wealth necessary to carry our national burdens and pay off our war debt, with, in fact, the whole future of Canada as an economic and national unit hanging in the balance, the people of this Dominion dare not allow its national and natural resources to remain indefinitely tied up awaiting the convenience of foreign interests for their development for use.

The Dominion Parliament and the Legislatures of those Provinces which have control of their natural resources would be acting well within their undoubted rights if they gave notice to all holders of undeveloped natural resources that development must be begun and prosecuted with vigor, not a mere surface scratching but real development consistent with the nature and extent of the resources held, and that, failing such development within a stated time, title to all such resources would revert to the people as represented by the Crown.

Such action could in no sense be construed as repudiation; it would rather be a proper enforcement of the rights of Canada and the Canadian people, and a very necessary recognition of Canadian manhood and independence and emancipation from a galling servitude which, if continued, sounds the death-knell of the Dominion.

The largest smokeable cigar ever made was presented to a New York politician. It was twenty-eight inches in length and weighed more than five pounds.

Female moths have the strange power of being able to "call" their mates from miles around. Scientists have never yet obtained a satisfactory explanation of this mystery.

Britain Makes Another Payment

Washington Receives Over Sixty-Eight Million For Semi-Annual Interest

The U. S. treasury received payments from Great Britain, Finland, Hungary, Lithuania and Poland on account of their funded indebtedness to the United States.

The British payment, a semi-annual remittance on interest, amounted to \$68,310,000. It was paid in 5% percent treasury certificates with a \$75.94 payment in cash necessary to adjust the interest accrued.

The total payment from Finland, \$133,550, was made in cash. Hungary funded half of its third semi-annual payment of interest, and paid the other half, \$14,905.69 in cash. Lithuania also funded part of its first annual installment on principal and interest, and turned over to the treasury \$15,225 in cash, of which \$15,225 was for interest and \$50,000 for principal. This payment also was in cash.

The first payment on account of the Polish Government amounted to \$600,000, but approximately \$125,000 was turned over to the treasury last January, and the remainder was remitted on June 15 in cash.

2 Years' Backache

Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I lived in pain as it is to be undisturbed," writes E. S. Sloane, from Georgetown. "While in Smith Street Drug Store I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nerviline—the liniment that never fails. 35c at all dealers.

Grain Inspections at Calgary Since the beginning of the present shipping year, approximately 25,000,000 bushels of grain have been inspected in Calgary. Of this quantity 24,000,000 bushels were wheat.

BABY'S OWN TABLETS

ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers, and making teething easier. Concerning them, Mrs. Saluste Pfeiffer, St. Dunas, Que., writes: "I have used Baby's Own Tablets for the past ten years and an never without them. They have always given me the greatest satisfaction and I can gladly recommend them to all mothers of children. The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont."

Canal Saves Auto An auto standing on a street at Phoenix, Arizona, suddenly burst into flames. The owner pushed it into an irrigation canal. The flames were extinguished, another car pulled it out, and he drove off with only slight damage.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

New Grain Act

Would Make Provisions Uniform Throughout the Dominion Concurrent legislation to make provisions of the new Grain Act uniform throughout Canada and place them beyond question on the ground of constitutionality, should be asked of the Provincial Governments, especially those of the western provinces. This is the tenor of a resolution adopted by the agricultural committee of the house at Ottawa.

The resolution was sponsored by J. L. Brown, Progressive, Leduc, Man. It asks the Federal Government to take up with the Provincial Governments the advisability of passing such concurrent legislation at the earliest possible date.

Very often a sound investment is just a bit of speculation that turned out all right.

Farthest North Surveys

Department of the Interior Lays Out Plots at Six Points in Arctic

Six different points in the Franklin district of Northern Canada have now been surveyed for the Royal Canadian Mounted Police or for trading companies, as one of the results of the 1922 and 1924 Arctic expeditions under the North West Territories and Yukon branch of the department of the Interior.

Plans of these surveys are prepared by the topographical survey branch from the surveyor's field notes for filing with the registrar of the North West Territories. These surveys were made at Craig Harbor, Dundas Harbor, Strathcona Harbor, Ponds Inlet, Cumberland Sound and Rhea Strait, by F. D. Henderson, D.L.S. The last named point on Ellesmere Island, being only 750 miles from the North Pole, is the most northerly point at which any official survey has ever been made.

Canada's Problems

Sir Robert Falconer Addresses Educationists at a Dinner in London

Many educationists of note attended the dinner given in the honor of Sir Robert Falconer, president of the University of Toronto.

Sir Robert submitted that Canada's three greatest problems were: first, the internal unification of the Dominion; second, her future population; third, the complaint that Canada is reserved in her attitude towards Britain and the empire.

The western and maritime provinces are just now loudly expressing discontent and it is certain that they have received less from confederation than they legitimately expected, he stated.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Speculate On Canada's New Governor-General

Officials in London have already formed definite views as to the qualifications necessary for the important and responsible post of governor-general of Canada. The name of Prince Henry is again being mentioned, and it is noteworthy that he alone of all the Princes was present with his august father when the latter opened the new Canadian building on Monday, June 29, while his interest in all things Canadian has been patent for some time past. One thing can be definitely said with regard to the appointment, if Canada has any particular predilection for any particular person they have only to explain their preference in order to have it carried into effect. It is admitted that it will be a difficult task to find a man outside the royal family who is invested with sufficient prestige and influence to make the bonds between the motherland and Canada more secure.

Life was safer when all the hunking was done by geese.

Minard's Liniment For Neuralgia

Warren Harding Memorial

Statue to be Unveiled at Vancouver in September

An international memorial which in many ways is unique, will be unveiled in Vancouver on September 17 next, to perpetuate the remembrance of the late President Warren G. Harding's visit to Canadian soil in July, 1922. The unveiling will take place after the international convention of Kiwanis Clubs under whose auspices the memorial is being erected. Although the statue was first ordered to be built by a committee acting on the initiative of the Kiwanis Club of Vancouver, the subscription list was open to clubs in the United States as well, with the result that the objective of \$35,000, soon over-reached and the United States clubs insisted that they bear the entire expense, the amount subscribed by the Canadian clubs being returned to them.

The memorial will mark an event of which history offers no duplicate—that of a United States president making an address on Canadian soil during his term of office. President Harding visited Vancouver for a few hours on his way south after visiting Alaska in July, 1923, and was given an impressive reception. His address, in which he made an eloquent plea for continued friendship between the English-speaking peoples and practically between Canada and the United States, was listened to by over 20,000 people and aroused considerable interest throughout the British Empire.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

The most perfect form of flattery is to say to people what they think of themselves.

Approximately 18,000,000 automobiles are in operation in the world.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

DR. FOWLER'S EXT-O-FRUIT WILD STRAWBERRY

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

"Don't accept a substitute." The genuine is put up only by The Dr. Williams Co., Limited, Toronto, Ont.

Introduction Of Garnet Wheat May Be Fraught With Great Possibilities In Future

The Dominion cerealists, recently addressing the agricultural council of the House of Commons, speaking of a new wheat developed at the experimental farms, made the statement: "The production of Garnet wheat may possibly in the near future replace the famous Marquis wheat. This new wheat has capabilities of high production in seasons of drought, ripens earlier than Marquis, even in wet weather, thereby escaping the possibilities of rust and frost, and it is hoped that Garnet wheat may extend the wheat growing area many miles farther north."

In an appreciation of Marquis wheat, it is difficult to grasp the full significance of this. Marquis wheat, developed by Charles Saunders, who was recently granted a pension of \$5,000 per year by the Canadian Government for his invaluable contribution to the continent's agriculture, and was awarded the gold medal by the Royal Society of Canada, has to some extent revolutionized wheat growing in America. In the past twenty years it has placed millions of additional dollars in the pockets of Canadian and United States farmers. The state forces attention to what has been accomplished in wheat growing in Western Canada.

The development of the raw plains of the west into a productive territory known familiarly as the "Granary of the Empire" has been rapid and sensational. In the early eighties, when the Canadian Pacific Railway first thrust its steel into the area and government and railway advertised the area as a grain-growing territory, the possibilities of wheat production were regarded very acceptably, and many authorities stated dogmatically that it would never be produced economically there. In 1924, forty years later, Canadian wheat acreage was 22,565,000 and the estimated spring wheat production 271,622,000 bushels. This compared with an acreage of 5,623,000 and production of 475,722,000 in the United States in the same year. Canada's yield in the past year was equal to nearly 15 per cent of the world's wheat crop grown in 21 countries, as recorded by the International Institute, as against 32 per cent in that of the United States crop.

In 1911 Canada first entered the international lists with her wheat, since when she has fallen in only one year to carry away the wheat champion ship, when she had the consolation of knowing that the winning Montana farmer had produced his crop from Canadian seed. The yield of wheat in Canada is consistently higher than in other countries of similar conditions. The world's record wheat crop was grown in Alberta in 1923, when 108,445,000 bushels were produced on 5,963,261 acres, an average of 28 bushels to the acre of wheat weighing 61 pounds to the bushel.

Hog Feeding Experiment

Self-Fed and Trough-Fed Hogs Are Compared

In feeding experiments with Berkshire hogs, conducted at the central experimental farm, tests have been made of the relative merits of self-feeding and trough-feeding. According to the report of the Dominion animal husbandman for 1924, in these tests the self-fed hogs made the greatest gains, but they consumed more feed and cost more per pound of gain. They were thicker and heavier at the shoulders than the trough-fed lots, but the latter produced a more desirable type of bacon carcass.

Easily Explained

Two Irishmen stood in front of a drug store in Dublin. In the window was a display of rubber gloves.

"Now I wonder what is those things for?" asked one of the Irishmen. "Oh," replied the other Irishman, "you can put them things on an wash yer hands without gettin' yer hands wet."

Enthusiasm sometimes carries people away only to leave them to return in disgust.

When a girl is in love she doesn't carry his letters in her pocket.

W. N. U. 1632

A Never-Ending Warfare

Man Will Always Have to Fight Insect Enemies

A never-ending warfare, without peace or armistice, must be carried on by mankind against his insect enemies, says Casper's Weekly. If insect pests had their own way unchecked even for a single season they would seriously endanger, if not wipe out, the world's food supply. For example, a single pair of potato bugs starting in the spring, if permitted to reproduce without hindrance, would increase to 60,000,000 of their kind before frost of the same year. Certain plant lice or aphids produce at the rate of thirteen generations in a season. The boll weevil destroys 5,000,000 bales of cotton annually.

Contrary to human progress in other lines, advancing civilization is helping to propagate and multiply these insect armies. Commerce between nations and increased travel between sections of the same nations have spread these pests everywhere. Congress at its last session voted \$2,500,000 to the United States department of agriculture to fight injurious insect life under the direction of Dr. Leland O. Howard, chief of the bureau of entomology.

Facts About The North

Where They Grow 419 Bushels of Potatoes to the Acre

The writer of the article in the Edinburgh Review, in which the area for profitable settlement in Canada north of the American border was put at less than a hundred miles, should read the report of the experimental sub-station at Fort Vermilion, Alberta, for 1923. It has been summarized in a bulletin issued by the federal director of publicity. This point is over seven hundred miles beyond the boundary line, but where wheat yields, nine varieties being sown, from thirty-seven to fifty-nine bushels per acre. As much as 419 bushels of potatoes was obtained per acre, and even one variety of garden crop produced a fair percentage of fully matured, though rather small crops. There were good crops of beans and other common vegetables, rapid growth made possible by long hours of warm sunshine.—Edmonton Journal.

New Zealand's Forestry

Has Realized Vision of Husbanding Her Forest Resources

The one-hundred plan of utilizing timber regardless of consequences is passing away. New Zealand has realized the wisdom of husbanding her forest resources none too soon. While much good work has been done by the state forest service, there is still room for more appreciation of the need for care and economy, and for more vigorous action toward securing them. On returning from the Empire forestry conference in Canada, the director of state forests said his was "more than satisfied. New Zealand must grow her own wood supplies or go without."—Auckland Weekly News.

The Human Factor

In discussing the human factor in industrial accidents, Mr. W. H. Cameron, managing director of the Chicago National Safety Council, tells of a colored sweeper in a woodworking establishment who became careless about a densely whirling saw. He put out his finger to see if the edge was really serrated. It was, and in explaining to the foreman a few minutes later how he lost the tip of his index finger, he said: "Yeah, ah just stuck out my finger like de Lawd's sake, dere goes an'ud!"

"Music Turner" Invented

Notice of the incorporation of a limited company with head office in Saskatoon, for the acquiring of the patent rights of an invention for turning shoes music, manufacturing the article and putting it on the market, appears in the issue of the Canada Gazette of June 6. The device was invented jointly by J. F. Rowe, of Guelph, Ont., and W. W. Eves, and in use the machine will turn sheet music by the player merely touching a lever with his knee or foot.

Why Barley Is Bearded

Provision Made By Nature To Protect the Grain

In nature there is a reason for everything, even though we may not be clever enough to find it. Since your first encounter with barley beards, you may have asked what useful purpose these things could serve. Recently Joe Robinson, a farm crops man at the Iowa State College, answered the question. Because such remarkable things as developing a spineless cactus have been accomplished with plants, he was asked why satisfactory beardless barley could not be found.

As anyone knows who has had barley beards in his clothing, they are very brittle and scratchy, readily breaking into tiny pieces, each one capable of mitching its way through the straw and particularly in the little stems that attach the kernels. These stems then become so brittle that the grain shatters too easily to be harvested. This it means that the beard serves as an outfit for an element that would otherwise damage the crop.

Of course, there are beardless varieties of barley, but as yet they have not given general satisfaction. It seems that nature intended barley to wear a beard and any attempts to remove it throw the plant out of balance.

Use Canadian Coal

Government Would Evolve a Scheme To Relieve Fuel Situation

An important statement was made in the House of Commons recently by Mr. George P. Graham, minister of railways and canals, in the course of the debate on the export of power from Canada. His statement dealt with the dependence of certain parts of Ontario and Quebec upon the imports of coal from the United States. He spoke as follows:

"I am glad to say that our discussions are temperate in this matter. We in Ontario and a portion of Quebec and in parts of the west depend largely for our coal upon the United States. Our anthracite has all to be brought in from the United States, and year after year when there is a scarcity we send our representatives over there to see that we get a square deal and up to date the United States has given us a square deal in giving us our share of anthracite, even though they were pressed very hard on the other side of the line to shut off our supply of anthracite. I might say that I am in hope, and the government are in hope, that before long we may be able to evolve a scheme which will relieve the situation to a large extent so far as anthracite is concerned, by the use of our own coal in the east and west for the manufacture of coke. That can be done, we shall be able to do it, provided that we are ready."

Passes Another Clean Test

Renewal Certificate Received For Large Herd Quebec

R. R. Neilsen and Sons, Howick, Que., have recently received a renewal certificate showing their accredited herd has successfully passed its yearly test for tuberculosis. The herd comprised 111 head of pure-bred Guernsey and Jersey cows and calves have made continually throughout the year. To be able to maintain a healthy herd under these conditions, coupled with constant visits to show yards in all parts of Canada is a tribute both to the sanitary methods employed by the owner and the efficacy of the tuberculin test.

Canada's Standing Timber

The total stand of timber in Canada is estimated to comprise 42,000 million feet board measure of saw material, and 1,330 million cords of pulpwood, fuel wood, posts, etc., a total of 246,335 million cubic feet. Of this, 108,946 million cubic feet is in the Atlantic provinces, 58,425 million in the prairie provinces, and 31,657 million in British Columbia, but British Columbia has 70 per cent of the saw material in the Dominion.

Messages can be transmitted at the rate of 220 words a minute in each direction at the same time over the new trans-Atlantic cable between New York and Rome.

Homesteading Is Still A Very Important Phase Of Western Land Settlement

When Horses Should Have Special Care

Harvest Season Unusually Hard On Neck and Shoulders

Horses will soon be on the mowing machines, and later will be doing their share on the self-binders. Perhaps no work that the horses are called upon to do is harder on the necks and shoulders than these very operations. On this account, every precaution should be taken to keep these parts of the animals in prime condition.

The first essential is the well-fitting collar. Next, after the well-fitting collar, comes the clean collar. The collar should be neat-fitting to every part of the shoulder so that there is no rubbing or chafing. Where there is a really good collar-maker available, he should be consulted, as skillful vision and skilled fingers can save no end of suffering and loss. When the horse has finished his turn at the mowing machine, he should have his shoulders washed out and thoroughly dried.

A little salt (at the rate, say, of a tablespoonful to a pint) should be added to the water. The shoulder should be thoroughly dried after the washing. If the shoulder should have the skin broken, there is but one humane procedure, and that is to cleanse the broken flesh and to allow it to heal. The skin throughout is to keep the skin healthy and free from inflammation, owing to undue or uneven pressure.

The matter of the proper fitting of the collar should be looked after at least daily, as horses' necks change in size with working or with change of work, according to the pressure or the change of motion applied to the collar. An ounce of precaution in collar trouble is worth several tons of cure.

Milk Good For Poultry

Keeps Fowls Healthier and Acts As A Tonic

Is milk a substitute for a 20 per cent meat mash as a feed for chickens? According to the results of an experiment conducted by the poultry department at South Dakota State College, it is. "If a farmer has milk, he ought to feed some of it to his chickens," states G. L. Stevenson, head of the department. "Milk can be fed to chickens to better advantage than to hogs and older calves. Furthermore, it will pay anyone to buy milk for the young chicks."

The results of the experiment show that although milk is a substitute for meat mash if both the meat mash and the milk have to be purchased, the meat mash will supply the necessary protein to the chickens for less cost. A point in favor of the milk, however, is that it keeps the fowls healthier. The lactate acid in the milk seems to act as a tonic.

Experiment With Cucumbers

Pickle Plant May Be Established In Southern Alberta

Experimental plots have been planted to cucumbers this year by farmers in the Lethbridge northern irrigation district, to determine whether or not this vegetable can be grown successfully and in large enough quantities to justify the establishment of a pickle plant in Taber or in the immediate neighborhood. If the cucumbers can be grown at a profit, Charles Hamel, of Spokane, Washington, plans to seed, sixty acres and arrange for the erection of a pickle factory next year.

Hospital Cars On Trains

The Japanese Government has decided to install hospital cars on all the trains of the national railways to care for third-class passengers who become sick while on a journey or who are travelling while seriously ill.

Wireless Torpedo Invented. To counteract the pilotless aeroplane, an aerial torpedo has been invented. It is claimed that the torpedo could be made to pursue and destroy the pilotless aeroplanes through wireless control.

Hydraulic cement was used in ancient Rome by mixing and baking lime and volcanic ashes.

That homesteading is still an important phase of Canadian land settlement and that the day of the acquisition of free western land is by no means over, though lying farther and farther from existing railway lines each year, is made evident in the last report of the federal department of the interior. This shows that in the last fiscal year a total of 3,842 homestead entries were made in Western Canada, 1,899 being in Saskatchewan, 1,236 in Alberta, 623 in Manitoba, and 156 in British Columbia. A homestead consists of a quarter section of 160 acres of land, so that this method of land acquisition alone in the past year resulted in the settlement on 614,900 acres. To this should be added soldier homestead grants which made an additional 113,600 acres, bringing the total settlement upon free government land in Western Canada up to 728,500 acres. This is not a bad showing in view of the state of immigration in that year and the reputed apathy towards land settlement.

It is gratifying to find that the English-speaking races continue to preserve their majority in Western Canadian land settlement. Though nearly thirty nationalities are represented in these homestead filings last year, Canadians led with 1,277 entries, followed by citizens of the United States with 637, and those from the British Isles with 576. These three classes accounted for nearly 70 per cent of the total registrations. More than four hundred of the British settlers were English and more than one hundred Scotch, whilst the leading states in the forty-two represented were Minneapolis, North Dakota, Iowa, Illinois, South Dakota, Wisconsin and Michigan.

Homesteading has unquestionably been a great factor in the settlement of the great agricultural tracts of Western Canada, the extent of government land so occupied to date being 54,000,000 acres. Following this has been the settlement upon western lands effected by the Canadian Pacific Railway, which has accounted for another approximately 30,000,000 acres. That homesteading continues to be a factor in western land settlement is evident from the observations in the department's report that in the last year newly surveyed lands in fifty-nine townships were made available for homestead entry, thirty being in Manitoba, ten in Saskatchewan, and nineteen in Alberta.

Land settlement in Western Canada is more systematized and regulated today than it has ever been, a situation forced on the country by steadily increasing settlement. In addition, the homestead statistics are being made available by survey each year.

Round Up Valuable Animals

Many Horses and Cattle Are Impounded in Saskatchewan

Hundreds of horses and cattle have been impounded in Saskatchewan, including a number of valuable Clydesdales and Percherons.

This is the season of the year when poundkeepers are busy. Advertisements under the Stray Animals Act in the Gazette have multiplied ten-fold, nearly a thousand animals being advertised as impounded. Agricultural experts attribute the increase at this season to the fact that with the crops above the ground there is a general disposition on the part of the rural population to see that stray animals are rounded up out of harm's way where they will do no damage to the growing crops.

Should Not Be Strange

The Anglican Bishop of Quebec says Cardinal Bégin calls on him every year and he calls on the cardinal, and relations are courteous and friendly. The significance of such a statement is that it is regarded by some newspapers as a fine example to other provinces. A resident of Mars might think that after 2,000 years of Christianity it might be taken for granted that two distinguished followers of his founder could meet occasionally and maintain friendly and courteous relations.—Chatham News.

In 1877 all the telephones in the world were made by two men in a little shop in Boston.

A Romance of the Spanish Main CAPTAIN BLOOD by RAFAEL SABATINI

Copyrighted, 1932, by Rafael Sabatini.
"CAPTAIN BLOOD," a Viagraph picture with J. Warren Kerrigan
in the title role. An adaptation of this thrilling novel.

CHAPTER XXV.—Continued.

Within an hour, the water-casks at least replenished and stowed aboard, the Arabella and the Elizabeth put to sea upon that angry chase.

"What now, Peter?" cried the young Jeremy Pitt. "Lord, man what is there here to fret you. Surely 'tisn't the thought of Rivalro!"

"No," said Blood quickly. "And for once he was communicative. It may well be that he must vent the thing that oppressed him or be driven mad by it. And Pitt, after all, was his friend and loved him, and so, a proper man for confidences. "But if she knew! If she knew! Oh God! I had thought to have done with piracy; thought to have done with it for ever. Yet here have I been committed by this scoundrel to the worst piracy that ever I was guilty of. Think of Cartagena! Think of the hell those devils will be making of it now! And I must have that on my soul!"

Setting a course for Hispaniola, since they judged that thither must Rivalro go to refit before attempting to cross to France, the Arabella and the Elizabeth ploughed brightly northward with a moderately favourable wind for two days and nights without ever catching a glimpse of their quarry. The third dawn brought with it a haze which circumscribed their range of vision to something between two and three miles and deepened their growing vexation and their apprehension that M. de Rivalro might escape them altogether.

They had Jamaica on their larboard beam some thirty miles to westward, and indeed, away to the northwest, faintly visible as a bank of clouds, appeared the great ridge of the Blue Mountains whose peaks were thrust into the clear upper air above the low-lying haze. The wind was westerly, and it bore to their eyes a booming sound, whose occasional increased ears might have passed for the breaking of surf upon a lee shore.

"Guns!" said Pitt, who stood with Blood upon the quarter-deck. Blood nodded, listening.

"Ten miles away, perhaps fifteen—somewhere off Port Royal, I should judge," Pitt added. Then he looked at his captain. "Does it concern us?" he asked.

"Guns off Port Royal . . . that should argue Colonel Bishop at work. I think it may concern us. Anyway, we'll stand in to investigate."

Close-hauled they tacked weather, guided by the sound of combat, for an hour, perhaps. Then, as, by telescope to his eye, Blood saw the haze and the guns abruptly ceased. They held to their course, nevertheless, with all hands on deck, eagerly, anxiously scanning the sea ahead. And presently an object loomed into view, which soon defined itself as a great ship on fire. As the Arabella with the Elizabeth following closely raced nearer on their northwesterly track, the outlines of the blazing vessel grew clearer.

"An English ship!" he cried.

He scanned the seas for the conqueror in the battle of which this grim evidence was added to that of the sounds they had heard, and then at last, as they drew closer to the doomed vessel they made out the shadowy outlines of three tall ships, some three or four miles away standing in toward Port Royal. Pitt, who, through the telescope was examining the receding squadron, observed things apparent only to the eye of the trained mariner, and made the incredible announcement, that the largest of these three vessels was Rivalro's! Victory-leuse. They took in sail and how to as they came up with the drifting

boats, laden to capacity with survivors.

CHAPTER XXVI.

The Service of King William

One of the boats bumped alongside the Arabella, and up the entrance ladder came first a slight, spruce little gentleman in a coat of mulberry satin laced with gold, whose wisened, yellow, rather peevish face was framed in a heavy black periwig. His mulish and costly apparel had no more to do with the adventure through which he had passed, and he carried himself with the easy assurance of a man of rank. He was closely followed by one who in every particular, save that of age, was the physical opposite, corpulent to a brawny, vigorous way with a full, round, weather-beaten face whose mouth was humorous and whose eyes were blue and twinkling.

As the little man stepped from the ladder into the waist, whither Captain Blood had come to receive him, his sharp, ferret, dark eyes swept the uncouth ranks of the assembled crew of the Arabella.

"And where the devil may I be now?" he demanded irritably. "Are you English, or what the devil are you?"

"Myself, I have the honour to be Irish, sir. My name is Blood, and this is my ship the Arabella, all very much at your service."

"Damme! What's to laugh at, you porpoise," spluttered mulberry-coat.

"Blood!" shrilled the little man. "O 'Sblood! A pirate!" He swung to the Colossus who followed him—"A damned pirate, van der Kuylen. Read my vitals, but we're come from Scylla to Charib's!"

"So?" said the other gutturally, and again, "So." Then the humour of it took him, and he yielded to it.

"Damme! What's to laugh at, you porpoise!" spluttered mulberry-coat. "A fine tale this'll make at home! Admiral van der Kuylen first loses his fleet in the night, then has his flagship fired under him by a French squadron, and ends all by being captured by a pirate. I'm glad you find it matter for laughter. Since for my sin I happen to be with you; I'm damned if I do."

"There's a misapprehension, if I may make so bold as to point it out," put in Blood quietly. "You are not captured, gentlemen; you are rescued. When you realize it, perhaps it will occur to you to acknowledge the hospitality I am offering you. It may be poor, but it is the best at my disposal."

"Damme. Do you permit yourself to be ironical?" he disapproved him. "An Lord Willoughby, King William's Governor-General of the West Indies, and this is Admiral van der Kuylen, commander of His Majesty's West India fleet, at present mislaid somewhere in this damned Caribbean Sea."

"King William," quoth Blood. "And who may be King William, and of what may he be King?"

"It is alluding to His Majesty King William III.—William of Orange—who with Queen Mary, has been ruling England for two months and more."

"D'ye mean, sir, that they're roused themselves at home, and kicked out that scoundrel James and his gang of ruffians?"

DR. HAMILTON'S PILLS
FOR
HEADACHE, BILIOUSNESS,
CONSTIPATION,
INDIGESTION,
KIDNEYS, LIVER,
BOWELS.

"Bile!" Hadn't you heard? Where the devil have you been at all?" Briefly he gave an account. After that, with renewed assurances that aboard his ship they should be honourably treated, Captain Blood led the Governor-General and the Admiral to his cabin, what time the work of rescue went on.

"Go home, if you will," said his lordship when comfortable. Here is a great chance for you, since you declare yourself sick of piracy. Should you choose to serve King William out here, during his war, you will find Pitt came in to report that the work of rescue was at an end, and the men picked up—some forty-five in all—sate aboard the two buccanier ships. He asked for orders. Blood rose. "I am neglectful of your lordship's concerns in my consideration of my own. You'll be wishing me to land you at Port Royal."

"At Port Royal?" The little man squirmed wrathfully on his seat. Wrathfully and at length he informed Blood that they had put into Port Royal last evening to find his Deputy-Governor absent. "He had gone on some wildgoose chase to Tortuga after buccaniers, taking the whole of the fleet with him." Blood cried sharply.

It was the Dutch Admiral who answered him. "Would he go dere if he were not? M. de Rivalro he take some of our men prisoners. Perhaps he'll bring back he make-dem tell. id is a great obdurdancy."

(To be continued)

Honors Memory Of Paul Kruger

Prince Places Wreath On Monument Of Britain's One-Time Foe

The Prince of Wales placed a wreath on the monument of Paul Kruger—"Oom Paul"—who was credited with being the soul of the policy that brought on the Boer War of 1899-1902. He was president of the provisional government after the war against Britain in 1881, and in 1883 was elected president of the Transvaal Republic. He held that office as long as the republic stood.

The Prince paid his tribute to the emperor's former enemy without any previous announcement or ceremony. He was accompanied by two members of his staff.

The climax to the Prince's visit to the Transvaal came when Pretoria was superbly illuminated and a symbolic procession was held in his honor. He was entertained at a dinner given by the administrator to 250 representatives from different parts of the Transvaal.

The Prince, in the course of a speech, expressed the hope of some day being able to visit South Africa again. "Gentlemen," he declared, "it is no polite platitude when I say I will do my best to come back."

Religious Tolerance in Germany
President Von Hindenburg has promised to foster the spirit of religious tolerance in Germany, and conscientiously to respect and protect all creeds. His declaration was made after he had received representatives of the inter-denominational church alliance, composed of German Evangelical, Catholic and Jewish delegations who called to congratulate him upon his assumption of the German presidency.

But for the need of horrible examples many a man's usefulness would never be properly listed.

She Said He Was "Incorrigible"

By Marjorie Bradford, Social Service Council of Canada

A woman brought her son into one of our Canadian juvenile courts a short time ago because, as she termed it, the boy was incorrigible. He would not stay in school and was getting his parents into continual difficulty.

When the boy gave his side of the story to the judge he said that school always gave him a headache.

The boy, on being examined by the court doctor, was discovered to be totally blind in one eye with the sight of the other already seriously impaired. And this poor ignorant mother thought he was "incorrigible." The boy was immediately given treatment which saved and even improved the sight of his eye. If the condition had been known in time the sight of his other eye might also have been saved.

Of 24,000,000 school children in the United States, 6,000,000 are retarded in their studies. And of those 6,000,000 retarded children, 2,000,000 are retarded because of defective eyesight. It is estimated that defective eyesight among school children costs American taxpayers \$130,000,000 a year.

Similar figures for Canada are not available but they are estimated to be tardied because of defective eyesight. That is more than 8 per cent. of our Canadian school children are suffering under a mental handicap because of defective eyesight. I wonder how many of these children have been adjudged stupid or "incorrigible?"

Admiral Sturdee's White Feather

Naval Hero Equipped As Slacker By Ultra-Patriotic Woman

Admiral Sir Doveton Sturdee, who died in England this spring, was the admiral who chased and defeated the squadron of Admiral Von Spee off the Falkland Islands, the second year of the war. When, after that battle, he returned to England early in 1916, he followed the custom of every other officer of his time and went straight into mufti. At that time ultra-patriotic young ladies were infesting the streets of London and other English cities, thrusting white feathers into the heads of able-bodied men who were not volunteering for service. As Sturdee was walking down Whitehall on his way to the admiralty, he was held up by one of these young women, who gravely presented him with a white feather, which she then thrust into his coat lapel, and exhorted him to turn into the adjoining recruiting office at Scotland Yard without delay. Thus equipped as a poltroon, the hero of the biggest naval victory since Trafalgar marched down Whitehall to talk over the details of the affair with his colleagues of the admiralty—Argonaut.

Figure

Strenuous efforts are being made in agricultural districts of England to save the picturesque old-fashioned village blacksmith from passing into oblivion. The smith of England today is not "knitting and reknitting" to draw undue attention to himself, but is "sorrowing" a great deal more than in the days when Longfellow idealized him, all because of the advent of the automobile and the motor tractor.

In their desire to save the village blacksmith the Hertfordshire county council members announced recently particulars of a plan designed to keep alive the decaying industry which has been so hard hit by the modernization of the big manufacturers and their agents who supply standardized parts of farm implements and machinery on lines of mass formation. The ministry of agriculture too has become interested in the scheme to prevent the passing of the blacksmith and has agreed to cooperate in the movement.

Natives in Congo Superstitious
The natives in the Congo region are firm believers in magic and witchcraft. The number of people annually put to death owing to this horrible superstition is unknown, for the witch-doctors pursue their dreadful trade in secret, but it is believed to be very large, for no mercy is shown to anyone convicted of witchcraft.

Submerged Village Re-appears

Roofs Of Swiss Houses Visible After 300 Years

After 300 years, a submerged Swiss village in the upper valley of the Saas has re-appeared, owing to the low level of the waters of Lake Aarona. The original catastrophe was caused by a landslide from the Monte Pozzoli, which destroyed 42 houses of the village of Androna Piana, together with the inhabitants and their cattle. As a result of the landslide a lake was then formed, but owing to the waters now receding the roofs of the old dwellings are again visible.

STOMACH TROUBLE DUE TO THIN BLOOD

It Usually Disappears When the Blood Is Made Rich and Red

"Thin blood is one of the most common causes of stomach trouble. It affects the digestion very quickly. The glands that secrete the digestive fluids are diminished in their activity, the stomach muscles are weakened and the power of nerve force. In this state of health nothing will more quickly restore the appetite, digestion and normal nutrition than good, rich, red blood."

Dr. Williams' Pink Pills act directly on the blood, making it rich by means of the iron and the blood-strengthening weak nerves, stimulates tired muscles and restores normal activity of the glands that supply the digestive fluids. This is shown by an improved appetite. Note the effect of these blood-enriching pills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of irritable and listless. If your appetite is feeble, if you have any of the above-said signs and symptoms of indigestion, you should at once take Dr. Williams' Pink Pills and profit by the better condition in which they will put you blood.

These pills are sold by all dealers in the blood, making it rich by means of the iron and the blood-strengthening weak nerves, stimulates tired muscles and restores normal activity of the glands that supply the digestive fluids. This is shown by an improved appetite. Note the effect of these blood-enriching pills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of irritable and listless. If your appetite is feeble, if you have any of the above-said signs and symptoms of indigestion, you should at once take Dr. Williams' Pink Pills and profit by the better condition in which they will put you blood.

War and the Auto

In 1924, 19,000 human beings were killed and 450,000 were injured by the automobile in these United States.

This casualty toll of 449,000 Americans killed by the automobile in the year 1924 is numerically 50 per cent. greater than was the total casualty toll for the American armies and navies in the nineteen months while the United States was at war with Germany.—Louisville Courier-Journal.

We didn't know a couple were married until we saw them yawning.

PAINS IN BACK AND SIDES

Ended by Taking Lydia E. Pinkham's Vegetable Compound

Fustiler, Saak—"For two or three days every so often I would have such pains in my back and sides that I could not do anything—could not even lie quietly in bed, and my head ached, too. I was this way for three years, but was worse after I was married. I was on a farm with not a house nearer than five miles and there was not a person to advise me, as my folks live in Manitoba. My sister-in-law told me about Lydia E. Pinkham's Vegetable Compound and told me to try it. I took her advice and was then thankful for it over since. After taking the medicine for three months I can say it has helped me a lot and I am doing fine. I am glad to recommend it to everyone and to others and you may publish my testimonial."—Mrs. HELEN BALANOFF, Fustiler, Saskatchewan.

Often some slight trouble will cause a general upset of the system. Such symptoms as nervousness, painful twinges, irregularly, backache and headache indicate some form of female weakness. Women so bothered should give Lydia E. Pinkham's Vegetable Compound a trial. This dependable medicine has helped thousands of women and it is reasonable to expect that it will help you. Try it today. Your druggist sells this medicine.

VETERANS READY TO FORM BRITISH LEGION IN CANADA

Ottawa.—An organization of veterans of the Great War, to be known as the British Legion in Canada, is expected to grow out of the action of the Great War Veterans' Association, which, in annual convention here, unanimously adopted a resolution, placing its assets, totalling approximately \$8,000,000, and membership of about 80,000 at the disposal of Field Marshal Earl Haig, in accordance with the expressed wishes of the former commander of the British armies in France for complete unity among Canadian ex-service men.

While the identity of the G.W.V.A., which has been the senior ex-servicemen's organization in existence since the armistice, would be submerged by the proposed formation of a legion of all war veterans' organizations, the guarantee is asked that in the event of Earl Haig concurring in the proposal, the ideal of the G.W.V.A. be preserved, that the organization will not be allowed to disintegrate during the transition period, which is not to exceed one year, and that the adjustment bureau of veterans be not impaired.

Amend Temperance Act

Bill to Amend Canada Temperance Act Goes to the Senate

Ottawa.—The bill to amend the Canada Temperance Act has passed all stages of the House of Commons. It now goes to the Senate.

The bill chiefly affects the province of British Columbia and will give that province the right to prohibit importation of liquor into the province except for medicinal, sacramental and industrial purposes.

When the bill came up, considerable opposition developed from the Conservative benches. Brig.-Gen. J. A. Clark, of Burrard, B.C., and George Black, of the Yukon, objected that the bill was aimed at the private citizens and not at export houses.

Mr. W. L. Macdonald, Conservative member, gave hearty support to the bill. He said the liquor was being brought into British Columbia, ostensibly for export, and no excise was paid. It was shipped a few miles out to sea, smuggled back and bootleggers sold on a large scale in the province, at prices which the provincial liquor commission could not compete with.

Will Evacuate Ruhr August Sixteenth

Withdrawal of Franco-Belgian Troops Will Be Speeded Up

Paris.—The Franco-Belgian armies and technicians will evacuate the Ruhr by August 16th, the French cabinet approved the plan which will complete the withdrawal by that date, just one year after the London agreement whereby the Doves plan and evacuation were determined upon.

Gradual withdrawal of Franco-Belgian troops has been in progress for months, and this process will be accelerated to clear the Ruhr within the specified time.

Prince Inspects School Children
Johannesburg.—The greatest gathering of school children ever brought together in South Africa was reviewed by the Prince of Wales. It is estimated that the children numbered 35,000. It took the Prince a good half hour of hard walking in and out of the lines of the children to inspect them.

In spite of the great strain, the Prince is maintaining perfect health. After the inspection of the school children he visited the Turgentien race course.

Arabs Want Supervision By League
Geneva.—Reports have reached Geneva that a strong movement is taking place at Tangier to place the city under supervision of the League of Nations, somewhat similarly to Danzig. The thousands of residents, chiefly Arabs, are making a petition to that end, as they are not satisfied with the operation of the existing international regime.

W. N. U. 1533

Wheat Prices Hinge On Canada's Surplus

Chicago.—The world's price level for wheat will be determined largely by the amount of wheat Canada will have available for export this year in the opinion of S. C. Harris, a prominent member of the Chicago board of trade. "We believe that the Canadian situation will have the largest single influence in the world price of wheat," Mr. Harris declared. "We feel that domestic prices will hinge to a great extent upon the spring out-turn. Accordingly, we think it logical to state that we are in a period of doubt until these crops are made." Early reports from the Canadian north-west indicate a larger crop than last year, but not so large as that of 1923. The United States crop will be below that of last year.

Saskatchewan Livestock Pool

Investigating Committee-Hold Meeting In Winnipeg For Interchange of Information

Winnipeg.—The Saskatchewan livestock pool investigation committee met the stockyards interests at a meeting here, at which an interchange of information took place.

W. Walston, Regina, secretary of the committee; R. A. Wright, Drinkwater, representing Saskatchewan livestock board; E. Evans, of Moose Jaw stockyards; and Hon. George Langley, chairman of the committee, attended the meeting, which was held at the livestock exchange.

J. C. Staples, president of the livestock exchange, expressed the opinion that no great harm was done by packers who bought in the country as well as the open market, although harm might result if this was carried to an extreme. He complained that a glut on the market might last two or three days and that he knew of no way to prevent this. Wiring the farmers not to ship had no effect, as they shipped anyway. J. C. Staples, of the pool, forwarded this statement later. Mr. Staples expressed the opinion that the pool served the farmer better than the commission man. He pointed out that the price is in sorting the loads which always sold better than the separate animal, and in choosing the right market for each type.

Security Discussions

Premiers of German Federated States To Talk Matter Over

Berlin.—While numerous government departments have been studying the French reply to the German security pact proposal, active political discussion will now begin under the premiership of the Federated German States have been summoned to meet here.

Legal authorities, who have gone over the French note, find one of the greatest obstacles in the question of how to bring the French suggestions within the scope of the League of Nations covenant.

France's proposal that she act as guarantor for the powers along Germany's eastern frontier, is considered by these German Liberals who have consistently urged that Germany join the league, as nothing short of an affront to the league. Adoption of such a plan, they argue, would determine the whole league structure.

Shameen In State Of Siege

Canton Foreign Settlement Is Now Prepared For Emergencies

Canton.—Shameen, the artificial island which is the Canton foreign settlement, is in a state of siege.

Two gunboats, one British and one French, hold commanding positions in the creek separating Shameen from the city. All approaches to the island were fortified with piled-up sandbags and quickfiring guns, testifying to the preparedness of the foreign forces for emergencies.

Had Lean Year

Washington.—The marriage license clerk and witnesses in four American counties had a very lean year in 1923. The census bureau reports. In Grant county, Kansas, Mono county, California, Dolores county, Colorado and Owyhee county, Idaho, not one marriage license was issued.

LABOR TROUBLES ARE PENDING NOW IN BRITAIN

London.—The prolonged trade depression and consequent steadily mounting unemployment in Great Britain, which have long been subjects of grave concern, now have reached a point where a crisis is foreseen.

The Laborites mostly put the blame on the government, which they accuse of doing nothing; the employers cite high wages, and short hours, as among the chief causes of the trouble, while the government ministers seem to adhere to the view that they can only undertake active interference; at the request of both the employers and workers.

The situation came to a head with the closing of a joint inquiry by the operators and miners' representatives into the position of the coal industry, which has well, the worst sufferers from the depression. The owners announced they would give formal notice of their intention to terminate the present wage agreement at the end of July, and also demanding resumption of the eight-hour working day, instead of the seven hours now legal for miners.

Want Action On Coal Rate

Ontario Aroused Over Cancellation of Reduced Rate on Special Shipments

Toronto.—Cancellation by the Canadian National Railways of all the arrangements by which Ontario was to have received a 25,000-ton experimental shipment of Alberta coal has aroused not only the Ontario Government, but civic and trades organizations as well, to such an extent that demand was made upon the government that they support the appearance of a deputations before Sir Henry Thornton in Montreal.

Following the appearance before the Ontario cabinet of James Walsh, of the Canadian Manufacturers' Association; H. B. Clemes, general manager of the U.F.O.; and Thomas Marshall, of the board of trade, and numerous others, Hon. George S. Henry, acting premier, dispatched the following wire to the C.N.R. president:

"Large deputations of Ontario representing the government of the province and the various interests, desire interview with you regarding movement of Alberta coal for distribution in this province. Pleared to have date arranged as soon as possible."

Soviets Irrigation Project

Leningrad, Armenia.—Soviet's first national irrigation project, comprising a huge dam and 40 miles of canals, has been opened. The irrigation system was constructed largely by refugee labor. It will convert 50,000 acres of barren land into fertile agricultural and grazing areas. The estate involved the cutting of a tunnel through two miles of mountains and three years' labor.

Aristocratic Four-footed Immigrant

This highly bred Spaniel dog was raised by the Duke of Hamilton and is valued at \$100. He is the winner of many prizes and was dispatched from Glasgow by the Dominion Express Company on the Canadian Pacific Line, "Metagama" to Canada. He is going to a well-known sporting gentleman of Winnipeg and looks as though he will not leave many chances for prizes in the dog shows of the west. However his breeding he is evidently not too proud to be of assistance to fellow-immigrants and is here seen carrying a useful bit of information in the form of a placard as to money orders.

Amundsen Still Hopes To Fly Over Pole

King's Bay, Spitzbergen.—Roald Amundsen and the other members of the expedition which recently made an ineffectual attempt to reach the North Pole by aeroplane from Spitzbergen, have returned to Oslo, Norway. They took with them the aeroplane which brought them back from the Arctic Circle to Spitzbergen. Amundsen told the Associated Press that he believed land exists near the North Pole on the Canadian side. He looks upon the expedition just ended as experimental, his dream for years having been to make a flight over the pole, landing in Alaska. For this project he had now gathered much additional and valuable knowledge.

Medical Men Meet

Fifty-sixth Annual Meeting of Canadian Medical Association At Regina

Regina.—With addresses of welcome from Hon. J. M. Ulrich, representing Saskatchewan, and from Mayor Mason on behalf of the City of Regina, and with greetings from official representatives of the British, Chinese, Newfoundland and American Medical Associations, the fifty-sixth annual meeting of the Canadian Medical Association was officially opened in the Normal School here.

In attendance were about three hundred delegates from every province in the Dominion, from the Far East, the United States and from the British Isles, representing every branch of the profession.

This meeting of professional men from so many parts of the world, said Mr. Ulrich, would be instrumental in bringing about better understanding of the problems to be faced by all. The visitors, he said, were assured of a royal welcome on the part of the province of Saskatchewan.

A similar enthusiastic welcome was extended to the delegates by Mayor Mason, who spoke for the City of Regina.

Stop Traffic In Tiles

Move in Britain To End Titular Honors In Return For Money

London.—The long promised government bill, making it an illegal offence to obtain titular honors in return for money payments, was introduced in the House of Commons by the Marquis of Salisbury, Lord Privy Seal.

The question of trafficking in titles came up in the House of Lords early in May, when the Marquis of Salisbury, in answer to a question which had been raised by the Earl of Selborne, said the government proposed to introduce a bill this year with the object of making an attempt to render traffic in honors illegal, but he feared the time for the passage of the bill through the House of Commons could not be found this season.

PROPOSES TWO WESTERN MEN ON RAIL BOARD

Ottawa.—Right Hon. George P. Graham, minister of railways and canals, expressed the opinion in the House of Commons that the board of railway commissioners was "rather too large and unwieldy." A vote of \$239,359 for maintenance and operation of the board was under consideration. G. W. Coote, Progressive, McLeod, asked whether the government proposed to increase the number of commissioners.

Mr. Graham replied that in his opinion the board was, if anything, too large at present. There was no provision in the estimates for an increase in the number of commissioners, but he thought that some readjustment, which would give the west more adequate representation, might be feasible. This question was a large one, and any change in the constitution of the board would require legislation.

Mr. Coote said he would like to see the board more representative of Canada as a whole. The west now has only one representative on the board and with the Grey and New Brunswick cancelled, would be completely at the mercy of the board. He asked the minister if he thought the west was likely to receive justice at the hands of the board.

Mr. Graham replied that the question of having another western representative on the board was well worthy of consideration. He did not admit that the west would be treated unjustly by the board, as at present constituted, but a western man might bring to the board a somewhat different point of view.

Clears Up Mystery

Discover Remains of Members of Stefansson Polar Expedition

New York.—Another mystery of the Polar region was solved when H. A. Snow, his game warden and employee, just returned from a two years photographic exploration of the Arctic regions, announced the discovery of the remains of missing members of Vilhjalm Stefansson's North Pole expedition in 1914, on Herald Island.

Snow's discovery clears up the eleven-year-old mystery of the fate of the five members of the crew, one of the two parties in which the expedition was divided, who quit the ice-locked and sinking Karluk and started back to civilization.

The first party, led by Stefansson, completed the long trek after terrific hardships. The other party, led by the ship's doctor, was never heard from, and relief expeditions found no trace of it.

Snow declared he came upon the remains while taking pictures on Herald island, which is about sixty-five miles from the spot where the Karluk was lost. He believes the entire party perished of exposure and starvation.

Has Had Successful Year

Reports Show Weekly Press Association Made Good Progress

Winnipeg.—The accomplishments, activities and financial affairs of the Canadian Weekly Newspapers' Association for the past year, were fully dealt with at the opening of the organization's fifth annual convention here, and in all reports submitted, good progress was recorded. Four hundred delegates, representing all parts of the Dominion, as well as Newfoundland, were welcomed to the city by Mayor Ralph H. Webb, and the session was presided over by Lorne A. Eddy, of the Telescope, Walkerton, Ont., president.

Motor Bus Causes Strike

Shanghai.—The advent of the motor bus in China has caused a strike of 4,000 ricksha men in Nanking. They are protesting the starting of a bus service by the city and have attempted to block traffic by placing obstacles in the streets.

Hong Kong.—Britishers employed on the Canton-Kowloon Railway, arriving here said they had been warned privately by Chinese friends to seek safety, because "the Chinese are determined to kill one foreigner for every Chinese."

NEW SETTLERS FOR WESTERN CANADA

HUNGARIAN farm laborers, recent arrivals in Western Canada over Canadian National lines, who landed at Quebec from the S.S. of the Hungarian settlers directed from Antwerp. These were part of the Red Star Line, to farms in the Vermilion district of Alberta.

Monster Tuna Taken in Canadian Waters

As a writer of stirring tales of the Border and the mid-western states in the early days, Zane Grey has made an enviable record for himself, but now along he comes with another—a fish story—and better still, presents the proof in photograph, so that his yarn does not take on the semblance of a dream or a good bit of story-telling.

Tuna, weighing nearly half a ton, are the reward of ambitious anglers who fish in Nova Scotian waters, particularly in St. Ann's Bay, off Cape Breton. Three mammoth tuna have been taken from the locality, each holding the world's record in turn. Captain Laurie D. Mitchell's 710-pound tuna held a record for a number of years, till along came J. K. L. Roy of Montreal, well known as an owner of racing horses, director of the Canadian Pacific Railway and his skill as a fisherman. He landed a tuna after a 3 1/2 hours' fight, that measured 9 ft. and 2 in. in length, and 6 ft. in girth, and tipped the scales at 712 lbs. thus winning the honour of record tuna fishing from Captain Mitchell by 2 lbs.

His record seemed secure, when along in August, 1924, came Zane Grey and his brother, R. C. Grey, eager to catch big fish. They used a Nova Scotian-built schooner, a staunch little craft admirably adapted to their plans and needs. They got

three tuna, weighing respectively 638, 634, and then as a climax, the biggest tuna ever landed, weighing 768 pounds. "Had they gone in for anything larger, it would have required a C.T.R. freight car to haul it to the cannery at St. Andrews. The time taken to land the first was 4 hours and 10 minutes, for the second 38 min., which was caught by R. C. Grey, and 8 hours and 10 min. were spent to conquer the record breaker, with which Zane Grey is said to have wrested the palm from the C.P.R. director and won the title of champion tuna fisherman.

Other big fish of various species taken in various Canadian waters include a record pike caught in Big Lac Nominique in the Laurentians of Quebec, weighing 58 lbs.; a 28 1/2 lb. muskellunge caught in 1924 in French River, Ontario, by Samue W. Franklin of New York City; the world's record speckled trout, weighing 14 1/2 lbs., taken from Nipigon River by Dr. J. W. Cook of Fort William; and a great Northern pike, 4 ft. long with a weight of 21 lb. which gave Harold Sweetser of New York a 46 muskie fight on Nipigon.

Canada's infinitude of rivers and lakes are filled with a vast wealth of fish, many of them of record measure. J. K. L. Roy's 712 lb. tuna, the largest ever landed in Canada's waters.

Here and There

Canada spent \$49,066,179 last year for pensions and re-establishment of veterans of the Great War, according to a report recently issued from Ottawa by the department in charge of this work.

Without a dissentient voice over 4,000 cattle owners in 200 districts have voted to make Prince Edward Island a disease-free area under the Department of Agriculture arrangement which calls for a two-thirds vote of all cattle owners.

Two thousand young buffalo from the Wainwright herd will make a 700-mile trek northward this summer to the buffalo reserve on the Slave River where they will be turned loose to mingle with the wild bison which roam that area.

"In all parts of Canada and the United States," according to Robt. G. Hodgson, editor of the Fur Trade Journal of Canada, "Muskrat farms are being established, mostly on a large scale and they are rapidly turning what was once marshland of little value into the most productive part of the farm," Mr. Hodgson adds.

The record established recently at Acme when 114 horses worked in one field at one time seeding the crop of Mrs. C. W. King, has been broken at Gadsby, Alberta. When the neighbors of J. B. Ball who recently suffered a broken arm, put in his 100-acre crop, 39 outfits were at work on one day and 175 horses. The crop was put in in a single day.

H. E. Morris, whose horse Manna made a run away victory in the English Derby, will visit Canada in the fall of route to China from which country he will sail on the Canadian Pacific S.S. Minnedosa from Southampton on October 8, stay a short time in the Dominion, and sail from Vancouver for China on the S.S. Empress of Australia, October 29.

Rebuilt in nine months after the fire that destroyed it last October, the Chateau Lake Louise hotel opened for the current season on Sunday, May 31 as the Trans-Canada train arrived from its cross-continent run. The hotel was rebuilt under exceptionally difficult conditions in temperatures as low as fifty degrees below zero during which a wooden wall heated by stoves had to be erected about the construction works.

Following the opening visit by Their Majesties King George and Queen Mary to the Wembley Exhibition, the Duke and Duchess of York also went over the grounds. Their Majesties were especially delighted with Treasure Island, the Paradise of children, and travelled over the miniature Canadian Pacific train that runs around the Island, passing en route the replica of Banff Station and the reproduction of the Canadian Pacific Rockies.

Canada will be well represented at the New Zealand and South Seas International Exhibition to be held at Dunedin between November, 1925 and April, 1926. Both the Dominion Government and the Canadian Pacific Railway have announced their intention to send well-appointed exhibits to the Exposition. It is probable that the provincial governments and many Canadian manufacturers will follow suit.

Stony Plain and District.

At Spruce Grove on Friday June 28, to the wife of Jos. D Miller (Spruce Grove hotel) a son.

Mr and Mrs Leslie Barker and little daughter, from Jasper, are visiting with Mr and Mrs D M Barker of Carvel.

Mrs L M Larson and Mrs R Larson are now occupying their cottage at Edmonton Beach.

The rough road coming in from his home at Rosenthal was responsible for Wm. Goebel losing a tire and tube from a rear wheel. The loss was not noticed until he had reached Main street when a search was instituted.

The U.F.A. picnic at Winterburn yesterday afternoon drew a large crowd, a number of cars coming from the City. A good program of sports was run off, finishing up with a good dance in the evening.

The death occurred last week in Edmonton of Mrs Brenenstahl of Spruce Grove. Deceased was in her 39th year and left to mourn her loss her husband, a son and daughter. Interment took place in Spruce Grove cemetery on Saturday afternoon last.

A delightful dance was held Friday night last at Mewassin Schoolhouse, to bid farewell to the popular school teacher, Miss McKay, who is leaving the district after a very successful five-year term. The people of the district turned out in large numbers, and a very enjoyable time was spent.

A big time is predicted at the dance Holborn. U.F.A. is holding in their hall tomorrow night.

Motorists going to Evansburg will be pleased to hear a road gang started Saturday to fix the big hill.

Dame Knior now has it that a Provincial election will be held in Alberta Aug. 10, says the Leduc Representative.

The case involving the trustees of St Paul Church at Golden Spike was up for a hearing on Monday last, before Justice Hoyle, in Edmonton. The case was further continued till Monday next, July 6. Parlee appeared for the trustees, and McLaughlin for the Synod.

C. N. express money orders are now on sale at Clarke's Drug Store.

un-Licensed Insurance Agents

The attention of The Sun has been called to the fact that non-resident parties have been touring this district, soliciting insurance.

In placing insurance, the insured is entitled to know if the insurance agent has a current license; and, further, if the agent will turn in to the company the premiums he collects.

Those in Stony and district who went thru the painful experience this spring of having their policies cancelled by the company thru the 'neglect' of the local agent to forward the money paid him, will not need to be reminded to deal only with those agents known to be absolutely reliable.

Stony Plain and District.

Mr Jack McCulla, our popular Station master, is leaving this week on an extended tour of Canada and the adjoining Republic.

Mr J W Edkins is on a trip with friends at Troy, Montana, U S A.

Miss Marjorie Anderson of Edmonton was visiting this week in Stony.

The ladies of the Union Church held a very successful afternoon tea on Tuesday, in Ducholke's hall.

Mr Geo E Clarke, Strathcona, was in town Tuesday.

The Missouri Lutheran Synodical Conference opened its session yesterday in Stony Plain.

Some excitement was caused at Leasowe Monday, when it was found Fred Tucker the postmaster had not put in an appearance at his home since the previous afternoon. The neighbors were called out and a search was made. The police were notified, and Officer Jas. Smith motored to the scene. A systematic search by some 20 men was instituted, and continued until yesterday, but no trace of the missing man was found.

Lost, auto plate No. 37-550. Kindly notify The Sun.

Sporting Notes.

The new Mewassin baseball team will play the Duffield team tonight.

The Walther League and Stony ball teams played Friday night, winding up with a very even score.

Captain Eric Heichen had a busy time in Edmonton last Sunday and Monday, signing up a City team to meet his Invincibles at the big Sports yesterday.

Mr Pidgeon's Duffield ball-tossers played Ross Flats on Sunday and defeated them 20 to 6 runs.

TENDERS FOR SCHOOL BUILDING.

SEALED TENDERS addressed to the undersigned will be received up to 5 p. m. SATURDAY, JULY 11th, for the erection of a two-room school building. Plans and specifications may be obtained on application to Messrs R. P. & W. G. Blakey, Architects, Canada Permanent Building, Edmonton, on payment of a deposit of \$25.00 which will be refunded on return of the plans and specifications in good order and a bona fide tender. The lowest or any tender not necessarily accepted.

JAMES MALLOCH,
Secretary-Treasurer
Stony Plain Consolidated School
District No. 62,
Stony Plain, Alberta.

Stony's Sports Day

In spite of the rain storm on Monday, Stony "carried on" and held the promised sports. The muddy roads kept some away, but the sportsmen assembled about three, and the contests were on.

The football event was a first-class affair, the local team putting up a good argument for the honors with the visiting team—the Radial Rovers, from Edmonton. The latter got the best of the decision—2 goals to 0—and took back with them to the City the \$20 prize.

Strong team: O Hoffman, A E Michael, John & Ed Barth, Eric Heichen, E Dall, Dr Outway, Ily Sinner, D Moyer, J Schilt, before—Hly Miller.

The two old-time antagonists met in the baseball contest—Walther League and Stony, the latter team with all its old time reliable stars on deck. The play was very good, the College boys keeping the Stonys pretty busy at times. At the end of the 7th inning Stony had nothing but goose-eggs, so 2 more innings were played, Stony's opportunity came in the 9th, when they scored for the first time.

The final score was: Stony 3, W. League 6.

W. League—Maahover, J. Jac Ulmer, John Ulmer, Rosenthal, Hy Treit, Philip, Carl Louis and Henry Enders.

Stony—Val Mohr, G. Graden, McCulla, Dr Outway, Laird, S Zucht, Schilt, D Moyer, C Lory.

Following are some of the minor events—

Boys, 100 yds.: Alf Davis, Joe Graff 2, Joe Mohr 3.

Girls, 50 yds.: A. Fuhr, A Bishop 2, E. Dammhauer 3.

Foot race: Aug. Mohr, J Mohr 2.

Holborn News.

A largely-attended meeting was held in Holborn Hall last Thursday night, when those present were canvassed for membership in the three Farmers Pools. Several illuminating addresses were given, explaining in detail the working of the proposed Pools and the benefit which will accrue to those joining. Practically all those present signed up.

Among other matters discussed was the situation at Edmonton Beach, regarding the proposal to transfer some frontage on the shore for another stretch of land nearby. Mr J A Barrie, proprietor at the Beach, was present, and explained the advantages to the public were the transfer put thru. Mr Barrie backed up his arguments with a large diagram of the whole layout of the Beach property.
